A Message from the Office of the President

Dear Pitt-Greensburg Students:

The covid testing results to date for spring semester are as follows:

17 student cases in Week 1 (includes pre-move-in period and first week of remote classes)
28 student cases in Week 2
22 student cases in Week 3
14 student cases in Week 4
5 student cases in Week 5
3 student cases in Week 6

Of our 89 total student cases:

26 were unvaccinated and 63 were vaccinated (13 with boosters, 50 without boosters)
42 were commuters, 47 were residents
83 isolated at home, 6 on campus
Cases have included mild or moderate symptoms.

We've had 4 reported employee cases to date.

It's encouraging to have 2 weeks in a row with case numbers in the single digits. Let's keep the trend going in this good direction!

I hope you all have a great week academically and personally.

Sincerely,

Dr. Gregerson
President, University of Pittsburgh at Greensburg
